Amendments to the Claims:

This listing of claims will replace all prior version, and listings, of claims in the

application.

Listing of Claims:

1.   (currently amended) An application creation tool, comprising:

a first component, wherein a name of the first component in accordance with a naming

scheme is ~~based on~~ a concatenation of values for a plurality of attributes for an application which

the first component creates; and

a second component, wherein a name of the second component in accordance with the

naming scheme is ~~based on~~ a concatenation of values for the plurality of attributes for the

application which the second component creates.

2.   (original) The application creation tool of claim 1, wherein the plurality of

attributes comprises at least one of:

a programming language;

an application type;

a server type; and

a service type.

3.   (original) The application creation tool of claim 1, wherein the first component is

a first Java class.

4.   (original) The application creation tool of claim 1, wherein the second component

is a second Java class.

5.   (currently amended) A system, comprising:

a server;

a client coupled to the server, wherein the client comprises a server application creation

tool, wherein the server application creation tool comprises:

a first component, wherein a name of the first component in accordance with a

naming scheme is ~~based on~~ a concatenation of values for a plurality of attributes for a server

application which the first component creates, and

a second component, wherein a name of the second component in accordance with

the naming scheme is ~~based~~ a concatenation of values for the plurality of attributes for the server

application which the second component creates.

6.   (original) The system of claim 5, wherein the plurality of attributes comprises at

least one of:

a programming language;

an application type;

a server type; and

a service type.

7.   (original) The system of claim 5, wherein the first component is a first Java class.

8.   (original) The system of claim 5, wherein the second component is a second Java

class.

9.   (currently amended) A method for creating a server application, comprising the steps of:

(a)   issuing a service request for a server application creation tool;

(b)   gathering ~~values for~~ a plurality of attributes for a server application to be created;

(c)   creating a name of a component using the gathered ~~values for the~~ attributes using a naming scheme, ~~wherein the name of the component is a concatenation of the gathered values for the attributes~~; and

(d)   loading a component having the created name.

10.   (original) The method of claim 9, wherein the plurality of attributes comprises at least one of:

a programming language;

an application type;

a server type; and

a service type.

11.   (original) The method of claim 9, wherein the component is a Java class.

12.   (currently amended) A computer readable medium with program instructions for creating a server application, the instructions comprising the steps of:

(a)   issuing a service request for a server application creation tool;

(b)   gathering ~~values for~~ a plurality of attributes for a server application to be created;

(c)   creating a name of a component using the gathered ~~values for the~~ attributes using a naming scheme, ~~wherein the name of the component is a concatenation of the gathered values~~

for the attributes; and

    (d)   loading a component having the created name.

    13.   (original) The medium of claim 12, wherein the plurality of attributes comprises

at least one of:

    a programming language;

    an application type;

    a server type; and

    a service type.

    14.   (original) The medium of claim 12, wherein the component is a Java class.
